Art Unit: 3764

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 5-7, 9, 10, 12 and 17-19 are, drawn to apparatus, classified in class 482, subclass 83.
- II. Claims 13-16, drawn to method, classified in class 482, subclass 148.

The inventions are independent or distinct, each from the other because:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the method as claimed is used to suspend fabric between vertical members and then to suspend items on that fabric.
